

Week 3- Day 2 Assignment

1) Connect to jira via api

2)Fetch the user stories from jira to generate testcases

JiraCollection.postman_collection.json

Postman collection :

Screenshots:

The screenshot shows a Postman interface for a collection named 'JiraCollection'. The selected request is 'Fetch userstories', which is a POST request to the URL 'https://manual-testing.atlassian.net/rest/api/3/search/jql'. The request body is a JSON object with the following structure:

```
1 {
2   "jql": "key = \\\"SCRUM-2\\\"",
3   "fields": [
4     "key",
5     "summary",
6     "description",
7     "status",
8     "reporter",
9     "details",
10    "acceptanceCriteria"
11  ]
12 }
```

The response is a 200 OK status with a response time of 881 ms and a size of 2.17 KB. The response body is a JSON object with the following structure:

```
1 {
2   "issues": [
3     {
4       "expand": "renderedFields,names,schema,operations,editmeta,changelog,versionedRepresentations",
5       "id": "10001",
6       "self": "https://manual-testing.atlassian.net/rest/api/3/issue/10001",
7       "key": "SCRUM-2",
8       "fields": {
9         "summary": "Task 2",
10        "description": null,
11        "reporter": {
12          "self": "https://manual-testing.atlassian.net/rest/api/3/user?accountId=62753c58d7fd480668da99de",
13          "accountId": "62753c58d7fd480668da99de",
14          "emailAddress": "nikithasainen1@gmail.com",
15        }
16      }
17    }
18  ]
19 }
```

The screenshot shows a Postman interface for a collection named 'JiraCollection'. The selected request is 'Fetch userstories Copy', which is a GET request to the URL 'https://manual-testing.atlassian.net/rest/api/3/search/jql?maxResults=100&fields=key,summary,description,status,reporter,issuetype,acceptance...'. The request has the following query parameters:

Key	Value	Description
Key		
maxResults	100	
fields	key,summary,description,status,reporter,issuetype,acc...	
jql	project = SCRUM AND issuetype = Story	

The response is a 200 OK status with a response time of 486 ms and a size of 2.21 KB. The response body is a JSON object with the following structure:

```
1 {
2   "issues": [
3     {
4       "expand": "renderedFields,names,schema,operations,editmeta,changelog,versionedRepresentations",
5       "id": "10004",
6       "self": "https://manual-testing.atlassian.net/rest/api/3/issue/10004",
7       "key": "SCRUM-5",
8       "fields": {
9         "summary": "jhb-jmhn",
10        "issuetype": {
11          "self": "https://manual-testing.atlassian.net/rest/api/3/issuetype/10004",
12          "id": "10004",
13          "description": "Stories track functionality or features expressed as user goals.",
14          "iconUrl": "https://manual-testing.atlassian.net/rest/api/2/universal_avatar/view/type/issuetype/avatar/10315?size=medium",
15        }
16      }
17    }
18  ]
19 }
```

Prompt:

Analyze my existing code base and Implement Jira integration

GO STEP BY STEP up on my approval proceed with next step

--[Mandatory] Backend first then proceed with Frontend

Instruction

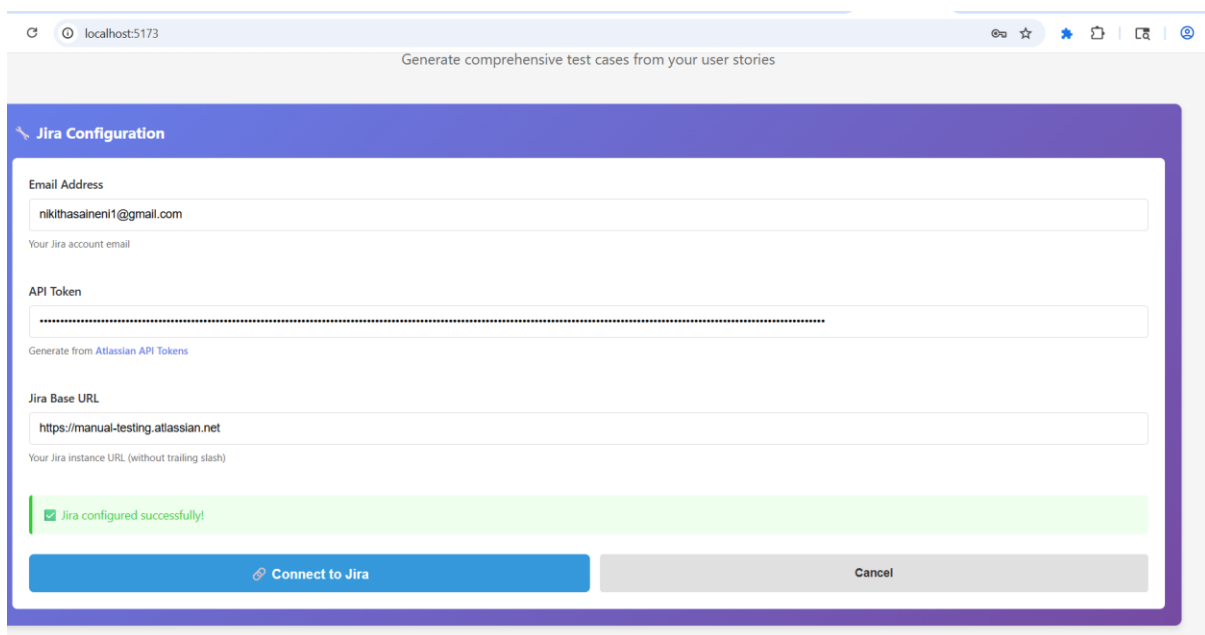

[MANDATORY] Implement Jira connectivity email,api key should be configurable

[CRITICAL] Fetch the Projects from Jira (Projects should be autopopulated as dropdown)

[CRITICAL] Fetch User stories for the project (user stories should be autopopulated as dropdown)

REFER MY POSTMAN COLLECTION

Output:

Generate comprehensive test cases from your user stories

Jira Configuration

Email Address
nikithasainen1@gmail.com
Your Jira account email

API Token
.....
Generate from [Atlassian API Tokens](#)

Jira Base URL

✅ Jira configured successfully!

[Connect to Jira](#) Cancel

Jira Configuration

Configure Jira

Select from Jira

Select Project

GenAI Manual (GM)

Select User Story

GM-9: Radiology Transactions Front Office

SELECTED STORY DETAILS

Key: GM-9

Summary: Radiology Transactions Front Office

Description: As a user, I want to radiology transactions front office so that the related functionality works as expected.

Status: Done

Story Title *

Radiology Transactions Front Office

Description

As a user, I want to radiology transactions front office so that the related functionality works as expected.

Acceptance Criteria *

Given the system is operational, when the user performs the intended action, then the system should respond accurately and meet functional expectations.

Additional Info

Jira Key: GM-9
Status: Done

Generate

Generated Test Cases

15 test case(s) generated • Tokens: 919

Test Case ID	Title	Category	Priority	Expected Result
▶ TC-001	Successful Login	Positive	High	User logged in successfully
▶ TC-002	Invalid Login	Negative	High	Login failed with error message
▶ TC-003	Patient Search	Positive	Medium	Patient details displayed
▶ TC-004	Patient Search with Empty Fields	Negative	Low	Error message displayed
▶ TC-005	Schedule Appointment	Positive	High	Appointment scheduled successfully
▶ TC-006	Schedule Appointment with Invalid Date	Negative	Medium	Error message displayed
▶ TC-007	View Patient History	Positive	Medium	Patient history displayed
▶ TC-008	View Patient History with No Records	Edge	Low	No records found message displayed
